Bioregulation Therapy
An advanced approach to health and wellbeing

Bioregulation Therapy (BRT) is a unique communication- and energy-focused modality that uses advanced pulsed electromagnetic field (PEMF) technology to support biological communications at the cellular level – ultimately helping the body to better self-regulate, adapt and heal naturally.

The importance of cellular communication
Cellular communication is critical to the body’s adaptation and regulation processes which help to maintain overall health and deal with the symptoms and causes of cell deterioration and disease. BRT combines advanced signaling technology with the body’s own biological communications, to stimulate cells and expedite the natural regulation and healing processes.

How BRT works
Every organ in the body has its own bioelectromagnetic field, and every single cell in the body communicates via electromagnetic signals, or fields, at the overall rate of trillions of chemical reactions per second. In order to maintain balance and sustain good health, all of the body’s organs, tissues and subsystems require precise communications to effectively process these instantaneous exchanges. When these critical communication exchanges are disrupted or blocked, the body’s cells, tissues and organs may be compromised and unhealthy symptoms follow.

A number of internal and environmental sources can contribute to the breakdown of the body’s inner communication processes. These sources include chemicals, toxins, nutritional deficiencies, emotional stressors, unprocessed memories, negative thought processes, inherited and acquired blocks at the subconscious level, microbes and electrosmog – high-power electrical lines, microwaves, computers, cell phones and other common electronic devices that, over time, may emit harmful electromagnetic fields.

During BRT sessions, BRT devices safely deliver very low intensity electromagnetic signals. These signals create gentle electromagnetic field changes that support effective biological communications within the body. More specifically, BRT signals target very specific communication channels in order to clear blockages and restore communication pathways. Once this happens, the body can more efficiently process the electrical and chemical exchanges associated with those channels and address imbalances or dysfunctions in those areas – leading to improved adaptation and natural healing.
Innovative and industry-leading technology
LENYO BRT devices are unique in the industry in that they all use an advanced signaling technology that enables precision when targeting biological communication channels, as well as low intensity signals that are safe and well-tolerated by the body. LENYO BRT products combine frequency, intensity, signal modulation and customized program design to stimulate the specific channels needed to best support the natural electromagnetic activities of the body.

A broad range of diverse applications
Beneficial for a wide variety of applications, LENYO advanced BRT devices work together with the body’s own inner communication processes to address a variety of needs and purposes.

- Health and wellness – anti-aging • allergies • detoxification • digestion • fatigue • inflammation • circulation • relaxation • chronic disease • stress • emotional wellbeing
- Sports – performance • recovery
- Workplace – circulation • concentration • digestion • electrosmog • fatigue • productivity • stress • ergonomics
- Education and learning – circulation • concentration • memory • stress

Versatile, user-friendly BRT devices
LENYO BRT devices are available in a variety of size and feature options – from professional multi-user systems to pocket-size, mobile devices that can be used in the home, at the office or on-the-go. Designed for optimum efficiency, LENYO BRT devices are ideal for professional practitioners, large health and wellness facilities, spas, sports centers, rehab and physical therapy facilities, offices, schools and the general public. With the most comprehensive range of BRT product choices in the industry – including both endogenous and exogenous options – LENYO BRT devices are non-invasive, easy to operate and safe for adults, seniors and children.

Established and recognized around the world
LENYO BRT devices utilize PEMF technology to deliver electromagnetic signals. Electromagnetic field therapy has been studied and practiced around the world for decades, and available in the United States for more than 30 years. Electromagnetic therapy has been approved by the FDA to heal bones and cleared to address a number of indications, from pain management to psychological problems.

| Worldwide | • ISO-13485 certification  
| • Designed and manufactured in the European Union since 1993  
| • Meets the Quality Assurance System set forth by the European Certification Society for Medical Equipment |
| US | FDA registration  
| • E24122 – HCC Biofeedback -Class II Medical Therapy Device (LCC)  
| • D174875-ISA- Therapy - Class I Medical Devices (all other devices) |
| Europe | • CE certified  
| • Approved as a Medical Class IIa and Safety Class II.BF (all devices) |

Learn more about BRT and the complete line of LENYO BRT devices at www.lenyosys.com.

ABOUT LENYOSYS. A leader in bioregulation technology and devices, Lenyosys is a division of Nestatek Inc., headquartered in Fort Lauderdale, Fl. Lenyosys provides advanced bioregulation therapy (BRT) devices and solutions to professional practitioners in the medical, wellness, sports, enterprise, educational and veterinarian fields, as well as home-use products to the general public. A unique communication- and energy-focused approach to health and wellness, BRT combines advanced pulsed electromagnetic field signaling (PEMF) with the body’s own biological communications to help restore natural regulation and healing activities. The LENYO line of BRT products includes office, home and mobile devices. For more information, visit www.lenyosys.com.
LENYO BRT devices have not been evaluated by The Food and Drug Administration (FDA). They are not meant to diagnose, treat, cure or prevent any disease. They do provide general benefits recognized for biofeedback and PEMF-based therapy devices. Individuals suffering from any disease or illness should consult with a physician or healthcare professional before using any BRT device.
